

RS energy / RSmon

• 1st order calibration

- $K_{\mu 2}(2)$ trigger is not clean due to BVL
- $K_{\pi 2}$ energy peak is too low and drifts
 - ↳ calibration files are not updated for "auto-run"?

redo this
after Pass 0

calibration files are not
updated for "auto-run"?

Benji ($K_{\mu 2}(2)$), Takeshi → • BVL calibration

Takeshi ~1mon. → • UMC - data matching OK?

dip angle distrib.
RS energy shape
BVL energy

Benji ~1 week → • Rate effect? → fit instead of mean?

Jim, Benji ~1 week → • RSmon to track gain shift

Joel → • Use dE/dx for calibration?

• Tetsuro → • 4 MeV μ calibration

• 2nd order calibration (RSmon)

- RSmon picks up gain drifts

- rate effect
- time-in-spill effect
- long term gain drift (1st order)

- Calibration method

Kentaro Benji, Jim → • Large calibration matrix file? ↗
in progress

- Understand the trend and fit?

Joe → • RSmon data → compact triple
+ BV/BVL

• TD area calibration

Milind → Tetsuro
