Table 7: Predicted number of Far Detector Events using the ANN30 at 3.25×10^{20} POT Exposure with $\Delta m^2 = 2.4 \times 10^{-3} \text{ eV}^2$, $\sin^2(2\theta_{23}) = 1.0$, and $\sin^2(2\theta_{13}) = 0.0$, no matter effects. Systematic errors are still being evaluated.
