

SEMINAR/COLLOQUIA NAME: Particle Physics Seminar
DATE OF TALK: Jan. 25, 2013 TIME: 3:00 pm

TITLE: New Physics from LHCb, including $B_s \rightarrow \mu^+ \mu^-$

ABSTRACT: I will summary results from LHCb. Many new rare decay modes and CP asymmetries have been measured. I will interpret these results in the context of models of physics beyond the Standard Model. Emphasis will be given to the channel $B_s \rightarrow \mu^+ \mu^-$

SPEAKER: Sheldon Stone
AFFILIATION: Syracuse University
